## **EXTENDED TEXT IN ENGLISH DESCRIBING THE FOSTERLANG PROJECT AND THE ONLINE SURVEY:**

**Tell us about the use of Irish and foster language diversity in Europe!**

As part of the EU-funded FOSTERLANG project, which focuses on fostering language diversity and on the self-empowerment of language communities across Europe, researchers at Dublin City University are promoting an online survey designed to investigate the use of Irish. This survey aims to collect real data about the role of Irish in everyday life, also in relation to technology, including AI, with a view to ensuring that the language is protected and promoted.

Share your experiences, opinions and suggestions that can help to foster language diversity in Ireland and across Europe. The online survey is available in Irish and English, and participation is completely anonymous and voluntary.

Thank you for taking the online survey and for helping the FOSTERLANG project to support the vitality of Irish and to promote linguistic and cultural diversity in Europe!
